DT3 Sandoval

UPDATE: 4th DENTAL BATTALION HEROES ARE COMING HOME SOON

More of our heroes are expected to return next week. They may not have access to phones or email to announce their exact arrival, however; the following information is accurate as of today. I have not seen the flight manifest myself, but its' existence is an indication of the "believability" of the date. As always, be flexible with dates and times.

A flight is scheduled to arrive on 12 Jun at MARCH Air Force Base with members of our Dental Battalion community. Upon arrival at MARCH, the members will ride buses to Camp Pendleton, CA. Berthing is available for them in the 22 area. At Camp Pendleton, each member will be given one of two options (there is NO pressure favoring one or the other choice).

1) remain on active duty to assist with other reservist demobilization activities
2) demobilize as soon as possible

In either case, the process of demobilization will require several days.
During their demobilization process, members will berth at Camp Pendleton – Area 22.

GREETING YOUR LOVED ONES:
Greeting our returning heroes is encouraged.
Greeting is possible once they have arrived at Area 22.

DO NOT ATTEMPT TO MEET THE PLANE AT MARCH Air Force Base. There will literally be hundreds of personnel shuttling through MARCH AFB.

Many thanks to the Key Volunteers: Dr. Kathy Berry, Ms Sarah Morris, Ms Linda Klein and the Key Volunteer Coordinator Mr. Fred Wilson.

God Bless their return.

June birthdays: Happy birthday to DT2 Wilson and DT3 Hayes.

A letter from CAPT Doug Henschel: (HenschelDJ@1FSSGDM.USMC.MIL)
* CAPT Henschel and DT3 Rock remain behind as rear party to provide surgical resuscitative support to retrograding Marines.
* CAPT Santoyo is still in Iraq with Charlie Surgical Company.
* "Everyday is a great laundry day, at least for drying your clothes. We had a trace of rain the first two weeks, maybe 2 or 3 times and that it is. Some days are fairly clear blue skies and the other half are a hazy sunshine but the haze portion is not from humidity. It is from wind storms." - CAPT Henschel
